

NICK CHRISTOFORIDIS

Front End Developer | UI Designer

Computer Science Graduate

I am a professional Front End Developer as well as a dedicated UI Designer. I specialize in creating high-quality, pixel perfect and responsive websites, as well as exceptional graphics that enable a strong online presence for businesses and individuals alike.

When it comes to Front End Development, I'm equipped with a robust skill set. I have a deep understanding of HTML, CSS, and JavaScript, and I leverage advanced technologies like React.js with the latest version of React Router, Redux Toolkit and React Query. This means I can build not just websites, but dynamic web applications that respond to user interactions in real-time. And of course, I'm well-versed in Next.js, ensuring your website is not only fast and efficient but also SEO-friendly.

As a UI Designer, I possess a keen eye for detail and a deep understanding of the principles of layout design, color theory and typography. I have experience working with design software such as Adobe XD and Figma in order to create prototypes and clean, modern, and responsive designs that are both aesthetically pleasing and functional.
